1. EXECUTIVE MAYOR'S FOREWORD

It is with a continued sense of responsibility and commitment to responsive governance that I present the 2025/2026 Adjusted Service Delivery and Budget Implementation Plan (SDBIP) of the Nkangala District Municipality. This adjusted plan reflects our municipality's commitment to ensuring that service delivery planning remains aligned with the realities of implementation, fiscal adjustments, and evolving developmental priorities.

In terms of the *Local Government: Municipal Finance Management Act (MFMA), Act No. 56 of 2003*, particularly *Section 54(1)(c)*, the Executive Mayor is required to consider and, where necessary, revise the Service Delivery and Budget Implementation Plan following the approval of an Adjusted Budget by Council. These revisions ensure that service delivery targets, performance indicators, and financial allocations remain aligned with the approved adjustments to the municipal budget.

Following the approval of the 2025/2026 Adjusted Budget by Council, the municipality has undertaken a comprehensive review of the existing SDBIP to ensure that the implementation plan remains credible, realistic, and responsive to prevailing operational and financial conditions. The adjusted SDBIP therefore reflects revisions to selected performance indicators, project milestones, and resource allocations, taking into account implementation progress, procurement developments, funding adjustments, and operational realities experienced during the financial year.

The adjusted total operating expenditure for the 2025/2026 financial year has been appropriated at R811 269 816 million, resulting in a budgeted deficit of R78 154 279 million, which will be funded from accumulated cash-backed operating surpluses. These adjustments ensure that the municipality maintains a responsible balance between service delivery commitments and financial sustainability.

The adjusted budget allocations across key service delivery sectors are summarised as follows:

Sector	Adjusted Budget Allocation	% Share
Community, Social and Environment	R6 863 309	1,74%
Finance and Administration	R470 000	0,12%
Health	-	0,00%
Internal Audit	R0	0,00%
Planning and Development	R39 244 003	9,94%
Road Transport	R17 960 858	5,55%
Waste Water Management	R41 683 996	10,55%
Water Management	R275 481 879	69,75%
Energy Sources	R5 000 000	1,27%

The adjustments contained in this revised SDBIP respond to several operational and strategic considerations, including the realignment of project milestones, incorporation of roll-over projects, adjustments to procurement timelines, changes in project implementation progress, and the refinement of performance indicators to ensure improved measurability and accountability. These revisions are necessary to ensure that municipal programmes remain achievable within the available fiscal envelope while maintaining our commitment to delivering tangible development outcomes.

Key infrastructure initiatives, particularly in water supply, sanitation infrastructure, road development, and municipal facilities, continue to receive significant attention within the adjusted implementation framework. At the same time, the municipality remains committed to advancing economic development initiatives such as learnership programmes, SMME support initiatives, and strategic planning interventions, which contribute directly to local economic development and social upliftment across the district.

The adjusted SDBIP further strengthens the municipality's performance monitoring and evaluation framework, ensuring that progress against service delivery targets is tracked effectively and that corrective actions are implemented where necessary. This reinforces our commitment to sound governance, responsible financial management, and improved accountability to Council and the communities we serve.

Despite fiscal pressures affecting local government nationally, Nkangala District Municipality remains steadfast in its determination to confront the persistent challenges of poverty, unemployment, and inequality, while continuing to support inclusive economic growth and sustainable development within the district.

As Executive Mayor, I reaffirm that this Adjusted SDBIP serves as the municipality's revised implementation framework for the 2025/2026 financial year, ensuring that municipal resources are deployed effectively and that service delivery commitments remain measurable, transparent, and aligned with Council-approved budget adjustments.

I therefore formally endorse this 2025/2026 Adjusted Service Delivery and Budget Implementation Plan, in accordance with the provisions of *the Local Government: Municipal Finance Management Act No. 56 of 2003* and other applicable legislative frameworks. This plan reaffirms our commitment to translating approved financial adjustments into practical implementation measures that will advance service delivery and improve the lives of the residents of Nkangala District Municipality.

Together, we remain committed to building a *District of Excellence and Climate-Smart Innovation*, driven by accountability, partnership, and sustainable development.

CLLR T.D. NGWENYA
EXECUTIVE MAYOR
Nkangala District Municipality

2. INTRODUCTION

The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Local Government: Municipal Finance Management Act (MFMA). In terms of Circular 13 of National Treasury, “the SDBIP gives effect to the Integrated Development Plan (IDP) and budget of the municipality and will be possible if the IDP and budget are fully aligned with each other, as required by the MFMA.”

As the budget gives effect to the strategic priorities of the municipality, it is important to supplement the budget and the IDP with a management and implementation plan. The SDBIP serves as the commitment by the Municipality, which includes the administration, council and community, whereby the intended objectives and projected achievements are expressed in order to ensure that desired outcomes over the long term are achieved, and these are implemented by the administration over the next twelve (12) months.

The SDBIP provides the basis for measuring performance in service delivery against quarterly targets and implementing the budget based on monthly projections. Circular 13 further suggests, “The SDBIP provides the vital link between the mayor, council (executive) and the administration, and facilitates the process for holding management accountable for its performance. The SDBIP is a management, implementation and monitoring tool that will assist the mayor, councillor’s, municipal manager, senior managers and community.”

The Municipal Finance Management Act (MFMA), Circular No. 88 of November 2017 provided guidance to municipalities on a common set of performance indicators applied for the 2025/2026 planning and reporting cycle onwards. The 1st addendum to Circular No. 88 of 4 December 2019 provided further guidance and clarity to metropolitan municipalities on the preparation of statutory planning and reporting documents required for the 2025/2026 Medium-Term Revenue and Expenditure Framework (MTREF). Both were for the attention of all municipalities. By adhering to the guidelines provided in Circular 88, municipalities can enhance the effectiveness and efficiency of their service delivery efforts. The integration of the SDBIP with the IDP and budget, coupled with robust performance management and reporting mechanisms, promotes transparency, accountability, and improved service outcomes for the benefit of the community.

3. LEGISLATION

The Local Government: Municipal Finance Management Act (MFMA) defines a Service Delivery and Budget Implementation Plan (SDBIP) as: a detailed plan approved by the mayor of a municipality in terms of section 53 (1) (c) (ii) for implementing the municipality’s delivery of municipal services and its annual budget, and which must indicate:

- a) Projections for each month of-
 - i. Revenue to be collected, by source; and
 - ii. Operational and capital expenditure, by vote;
- b) Service delivery targets and performance indicators for each quarter

Section 53 of the MFMA stipulates that the Mayor should approve the SDBIP within 28 days after the approval of the budget. The Mayor must also ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators as set out in the SDBIP are made public within 14 days after their approval.

Section 54 (1) (c) of the MFMA stipulates that on receipt of statement or report submitted by the accounting officer of the municipality in terms of section 71 or 72, the mayor must consider and, if necessary, make any revision to the service delivery and budget implementation plan, provide that revision to the services delivery targets and performance indicators in the plan may only be made with approval of the council following approval of an adjusted budget.

The following National Treasury prescriptions, in terms of MFMA Circular 13, are applicable to the Nkangala District Municipality:

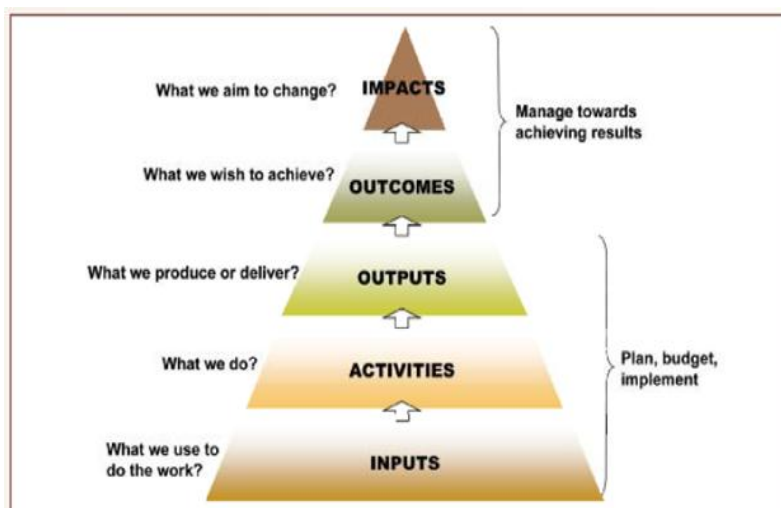

1. Monthly projections of revenue to be collected by source.
2. Monthly projections of expenditure (operating and capital) and revenue for each vote
3. Quarterly projections of service delivery targets and performance indicators for each vote
4. Ward information for expenditure and service delivery
5. Detailed capital works plan broken down by ward over three years.

4. METHODOLOGY AND CONTENT

The Priorities, Strategic Objectives, Programme Objectives influenced the development of the SDBIP and Strategies contained in the IDP ensuring progress towards the achievement thereof. The SDBIP of the Nkangala District Municipality is aligned to the Key Performance Areas (KPAs) as prescribed by the Performance Management Guide for Municipalities of 2001, with the addition of Spatial Rationale as another KPA to be focused upon.

The methodology followed by the municipality in the development of the SDBIP is in line with the Logic Model methodology proposed by National Treasury as contained in the Framework for Managing Programme Performance Information (FMPPI) that was published in May 2007. The accompanying figure as an extract from the FMPPI is hereby indicated.

The Logic Model was followed whereby desired impacts were identified for each strategic objective with measurements and targets contributing to the achievement of those impacts. This was followed by the identification of programmes and associated outcomes and measurements and targets contributing to the achievement of those outcomes, thereafter SMART programme objectives and short, medium and long terms strategies were developed to achieve the outcomes and associated output indicators and targets.

The strategies devised by the municipality, intricately linked to programmes, measurements, targets, and projects, are harmonized with National and Provincial priorities. The SDBIP incorporates key performance indicators and targets, alongside pertinent projects, aimed at measuring, monitoring, and reporting on the implementation of outcomes and strategies delineated in the strategic phase of the IDP. These indicators are assigned quarterly targets, with designated responsibilities for monitoring performance. The SDBIP is structured as a layered plan, with the top layer encompassing consolidated service delivery targets and periods, as depicted in the plan.

MFMA Circular No. 88, issued by the National Treasury on November 30, 2017, provides guidelines for the planning and reporting requirements for municipalities under the 2025/2026 Medium-Term Revenue and Expenditure Framework (MTREF). The circular aims to enhance the quality and consistency of performance reporting, focusing on a set of standardized indicators.

Key elements include:

Rationalization of Indicators: The circular introduces a standardized set of indicators to streamline planning and reporting processes. These indicators are categorized into outcome indicators, which measure the medium-term results for specific beneficiaries, and output indicators, which are linked to the delivery of municipal services.

Functional Performance Indicators: The circular outlines specific indicators for various municipal functions such as water and sanitation, electricity, housing, roads, environment, and emergency services. These indicators are intended to provide a common framework for measuring and reporting performance across municipalities.

MFMA Circular No. 88 seeks to improve municipal governance by promoting a more integrated and outcome-focused approach to planning and reporting.

5. INSTITUTIONAL PRIORITY ISSUES AND DEVELOPMENTAL NEEDS

8. CONCLUSION

The Service Delivery and Budget Implementation Plan (SDBIP) serve as a crucial monitoring instrument for the Executive Mayor and Council, facilitating real-time evaluation of the municipality's performance throughout the fiscal year. It imbues the budget and the Integrated Development Plan (IDP) with practical significance, thereby informing in-year reporting obligations as stipulated in sections 71 (monthly reporting), 72 (mid-year report), and 46 (end-of-year annual performance reports). This proactive approach empowers the Executive Mayor and Municipal Manager to swiftly address any instances of under-performance through timely remedial action.

Moreover, the SDBIP equips the Council with a robust monitoring mechanism to assess the municipality's performance vis-à-vis predetermined quarterly targets for service delivery.

MID-TERM REVENUE AND EXPENDITURE FRAMEWORK (MTREF): MFMA CIRCULAR NO. 129.

In response to MFMA Circular No. 129 on cross-cutting conditions, the following requirements apply:

- Municipalities are required to reflect all KPI amendments in their SDBIPs and Annual Performance Reports (APRs). Each change must be accompanied by clear, justifiable reasons and a description of the process followed.
- Both the original and revised KPIs must continue to be reported in terms of Section 52(d) of the MFMA, as well as in the APR, to ensure accountability and transparency.
- KPI amendments are not permitted during the fourth quarter of the financial year (April–June). Only changes necessitated by natural disasters or unavoidable and unforeseen expenditure may be considered during this period.

The table below outlines the KPI amendments effected during the mid-year of the 2025/2026 financial year.
